PROJECTS

Mood-Based Music Recommendation Web App

- Built a full-stack mood-driven music platform where users track emotions, write diary entries, and receive personalized playlist suggestions based on mood and activity.
- Designed responsive UI using JS, CSS and HTML.

- Designed a responsive glassmorphic UI with dark mode support and per-mood themes using CSS variables and vanilla JavaScript.
- Integrated third-party APIs for dynamic music recommendations and optimized the app for accessibility and excellent UX.
- Used **ChatGPT** extensively for ideation, debugging, and development support.
